

# Senior Video

Seniors,

The Computer Media class will once again be putting together a Senior Video to be presented on Senior Night. For this video, we take seven different pictures of each senior and morph them together. This creates the effect of the senior growing up when all the morphs are played together. You will receive a complimentary copy of the finished DVD.

We like to incorporate all the Seniors, but we need your help. We need each Senior to bring in seven pictures. These pictures are best if they span your life starting as early as you want (usually kindergarten or a nice baby picture) and growing up and finishing with your Senior picture. We can use the composite pictures for the senior picture. We can use other school pictures from the Guidance Office permanent files. However, these pictures are bad quality and do not produce the type of video we want to make. Also, if you did not attend WL-S your entire school career, we will be missing pictures from years prior to attending here.

For the best video, we need your pictures brought in by **February 24**. If pictures are not received by the deadline, you may not be included in the video. You will get all your pictures back. Please limit the number of pictures to seven. If you do not, we will pick which seven to use. Please place pictures in some form of envelope or bag with your name on them. Also, if possible, **identify your age on the pictures**.

Your pictures can be any size smaller than, and including 8 x 10. School pictures work best but any picture of you directly facing the camera is okay. The examples at the bottom of the letter show the type of pictures that work best. We can eliminate people and things around you as long as they are not blocking your head and shoulders. If you have any questions talk to me. You need to bring all the pictures to me, turn them in at the office or give them to Mr. Thomas. Thanks for all your help. We hope to present you with a great gift for Senior Night.

Thank you

*Mr. Yoder*
